EDUCATION

Michigan State University, College of Engineering East Lansing, Mi.
Bachelor of Engineering, Computer Science and Engineering, Minor in Physics December 2022 - December 2026

TECHNICAL CAPABILITIES

Proficient: Unix, C, C++, JavaScript, CSS, HTML, Python, Algorithmic Expressions, CAD, Microsoft Office Suite, Google Suite
Intermediate: Large Learning Models, React, SQL, Spring Framework, AngularJS, Docker & Kubernetes, C#, Excel, DaVinci Resolve…

PROJECTS

Personal Portfolio Website December 2024 - Present

- Refined HTML, CSS, and JS skills within a software Engineering environment. This page is a consistent work in progress and can be found through GitHub.

MSUTSO Website July 2025 - Present

- Utilized skills in web design working with HTML, CSS and JS to build an interactive and informative landing page for the MSU Transactional Services Organization at MSU. Provided a much more refined picture of the importance of communication and time management when completing a project for a team that is not personal.

Text-Based Game - Apple Intelligence Present

- Manipulating a Language Model for use in a choose-your-own-adventure style text-based game. This will be run on later iOS devices, Macs, and iPads, any devices with Apple Intelligence support, since these are known to run on-device language models consistently.
- The only stat necessary is health. Typing an action manipulates the story of the game. Every outcome of an input action will be determined by spelling and grammar. This is a work-in-progress project.

EXPERIENCE

Kellogg Hotel & Conference Center East Lansing, Michigan
Audio-Visual Technician January 2024 - August 2025

- Acquired valuable skills with mixers (the modulation of decibels in high, mid, and low frequencies for optimal listening experience), power efficiency, projection technologies, running audio and video to and from a Crestron system, and careful cable managementand organization skills on-site and in storage.
- Discovered ways to receive and relay information to guests and clients about what the hotel could provide and what they need optimally. These skills help me to explain concepts that may be foreign or new to anyone.

Clerical Associate July 2023 - January 2024

- Further experience in customer satisfaction and hospitality; acquired an understanding of OPERA Hotel Property Management solutions.
- Refined communication skills between coworkers and customers by becoming knowledgeable about the Hotel and prepared for unexpected situations to provide a quality guest experience.

STUDY ABROAD

Madrid, Spain
Quantum Computation and Information September 2025 - December 2025

- A culturally enriching experience with the goal of studying Quantum Computation, Quantum Communication, and discovering a higher level of interest in physics.
